INTERNSHIP TRAINING IN MEDICAL CODING

Objective:

The objective of the Fundamentals of Medical Coding (FOMeC) Internship Training is to educate students on reviewing clinical statements and assigning standard codes for medical record documentation.

Program Outcome:

Upon successful completion of the program, students will:

Gain Understanding of Anatomy and Physiology: Acquire knowledge of human anatomy and physiology, which is essential for accurately assigning medical codes.

Master Details of Medical Services: Understand the details of various medical services, procedures, and treatments, enabling them to code accurately based on the documentation provided.

Comprehend Rules and Regulations of Payers: Become familiar with the rules and regulations of healthcare payers, including insurance companies and government healthcare programs, ensuring compliance with coding standards.

Develop proficiency in assigning standard codes to medical procedures, diagnoses, and services based on clinical statements and medical records.

Learn how to effectively document their coding decisions, providing clear and accurate reports that support the coding process and ensure proper reimbursement.

Through this internship training, students will be equipped with the necessary knowledge and skills to review clinical statements, interpret medical records, and assign appropriate codes, contributing to accurate and efficient medical coding practices.
