BRIDGE COURSE - BASIC CONCEPT IN CHEMISTRY

Objectives:

- To build a strong foundational knowledge of chemistry.
- To understand core concepts in inorganic and physical chemistry.

- To expand general knowledge through engaging stories and examples related to chemistry.

Programme Outcome: Upon completing the program, students gained a deeper understanding of essential chemistry concepts, including the skill to accurately write IUPAC names for chemical compounds. Through interactive activities like role play, storytelling, and group discussions, students enhanced their engagement with the subject matter, making complex topics more accessible and enjoyable. These activities not only reinforced their chemistry knowledge but also developed their communication and collaborative skills. The program effectively prepared students for more advanced studies in chemistry by fostering both subject-specific knowledge and essential academic skills.
