ENTRY LEVEL TEST

The Entry Level Test on "Basics of History" was conducted to assess students' foundational knowledge and understanding of historical concepts. The primary objective of the test was to evaluate students' grasp of fundamental historical topics, identify their strengths and weaknesses, and gain insights into their preparedness for further study in the subject.

Objectives:

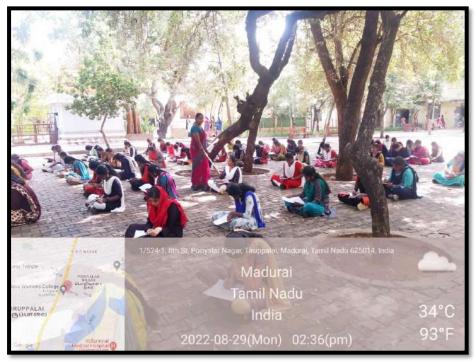

- To measure students' comprehension of basic historical concepts and assess their proficiency in the subject.
- To highlight areas of strength and pinpoint aspects where students might need improvement, thus informing future instructional strategies.

Programme Outcome:

The results of the Entry Level Test provided a comprehensive overview of each student's subject knowledge, skills, and abilities. It also assessed their intellectual quotient (IQ) on an individual basis. The test outcomes revealed varying levels of proficiency among students,

allowing educators to tailor their teaching methods to address specific needs. The assessment helps to identified key areas for development and equipped instructors with valuable insights to enhance the educational experience and support students' academic growth in history.
