ENTRY LEVEL TEST ON BASIC WEB SERVICES

Objectives:

The Entry Level Test on "Basic Web Services" was designed to assess the foundational knowledge of computer science students in the area of web services. The primary objective was to evaluate the students' understanding of key concepts such as web protocols, service-oriented architecture, RESTful services, and the basics of SOAP. The test aimed to identify the students' strengths and areas for improvement, providing a baseline for further education and skill development in web services.

E.M.GOPALAKRISHNA KONE YADAVA WOMEN'S COLLEGE

Programme Outcome:

The test achieved its objectives by accurately assessing the foundational knowledge of the participating computer science students. The results provided valuable insights into the students' grasp of essential web service concepts, highlighting their understanding of web protocols, RESTful services, and SOAP. The test outcomes also helped in identifying specific areas where students needed additional support or advanced training. Subsequently, the test laid the groundwork for targeted learning interventions, ensuring that students were better prepared for more advanced studies in web services and related technologies.
