ACTIVITY : CONSULTANCY SERVICE

YEAR : 2023-2024

DEPARTMENT OF CHEMISTRY

DATE	TIME	VENUE	
10.10.2023	11:00 a.m. to 03:00 p.m.	RC High School at Kathakinaru, Madurai	
Theme		Create awareness about water quality and Safety	
Nature of the Activity		Consultancy Service	
Title		Water Analysis	
Convener		Dr.S.Manimekalai Head & Assistant Professor of Chemistry EMGYWC	
Coordinator		Ms.K.Punitha Assistant Professor of Chemistry EMGYWC	
Beneficiaries		RC High School: Faculty - 12 Students - 33	

CONSULTANCY ON "WATER ANALYSIS"

Objectives:

- 1. To provide expert evaluation and recommendations for ensuring the quality and safety of water resources.
- 2. To explore and implement strategies for income generation through enhanced water management practices.
- 3. To identify potential contaminants, assess overall water quality, and offer actionable solutions to improve water treatment processes.
- 4. To develop sustainable business models that leverage water analysis services to generate income for local communities and organizations.

Program Details:

Comprehensive sampling and testing were conducted to analyze various parameters such as pH, turbidity, dissolved oxygen, and the presence of heavy metals

and microbial contaminants. The results identified specific areas of concern, including elevated levels of contaminants that required immediate intervention.

Based on these findings, tailored recommendations were provided to stakeholders. These included the implementation of advanced filtration systems, regular monitoring protocols, and best practices in water treatment and management. Importantly, the consultancy also explored commercial opportunities related to water analysis, such as offering specialized testing services to local industries, agricultural sectors, and residential communities.

Training programs were introduced to equip local personnel with the skills necessary to conduct water analysis and maintenance independently. This not only ensured sustained high-quality water management but also created job opportunities and promoted local expertise.

The consultancy in water analysis was a resounding success. It provided critical insights and practical solutions for maintaining high water quality standards, also providing sustainable income generation through innovative business models. This dual approach ensured that communities and organizations could benefit from safe, clean water and new economic opportunities, thereby promoting public health and economic resilience.

Programme Outcome:

The consultancy in water analysis delivered substantial insights and practical outcomes that not only improved water quality but also identified new avenues for income generation.
