ISSUE OF WORM CAPSULES

Objectives:

The objective of the Worm Capsule Distribution Program is to promote health and well-being among students and staff by addressing common parasitic infections. Through this initiative, the college aims to create awareness about the importance of preventive healthcare and to encourage good health practices among the college community.

Report:

Under the supervision of the college health and wellness committee, worm capsules were distributed to students and staff to help prevent and control parasitic

E.M.GOPALAKRISHNA KONE YADAVA WOMEN'S COLLEGE

infections. The program included a brief session on the benefits of deworming, the importance of personal hygiene, and proper nutrition to maintain a healthy lifestyle. Health experts were invited to provide additional insights and answer any questions, fostering a supportive environment for health-related learning.

Programme Outcome:

The distribution of worm capsules helped in improving awareness regarding preventive health measures among the college community. Students and staff actively participated, gaining a better understanding of the benefits of regular deworming and its role in enhancing overall health. This initiative contributed to a healthier, more informed campus, reinforcing the college's commitment to supporting student and staff wellness.
