<b>Theme</b>	<b>International Film Festival</b>		
<b>Participants</b>	<b>II year students</b>		

**INTERNATIONAL FILM FESTIVAL**

**Objectives:**

The International Film Festival aims to immerse students in the dynamic world of cinema, providing them with essential training and skill development through a range of engaging activities. This initiative seeks to foster creativity and critical thinking by offering workshops led by industry professionals, where students can learn about various aspects of filmmaking, including screenwriting, directing, cinematography, and editing.

Participants will have the opportunity to collaborate on short film projects, allowing them to apply their newly acquired skills in a practical setting. The festival will also feature film screenings, followed by discussions sessions with filmmakers, providing insights into the creative process and industry trends. Additionally, students will engage in networking opportunities, connecting with peers and professionals to enhance their understanding of the film industry. Ultimately, the festival aspires to inspire the next generation of filmmakers, equipping them with the knowledge and confidence to pursue their passion for cinema.
