SEMINAR ON "CYBER SECURITY"

Objectives:

To provide participants with essential technical knowledge and skills required to protect and defend computer systems and networks. The primary objective was to equip attendees with a deep understanding of the complexities involved in safeguarding IT infrastructures against various cyber threats.

Programme Outcome:

The seminar successfully enhanced participants' abilities to address and resolve security issues within networks and computer systems. Attendees learned to analyze potential vulnerabilities and apply effective solutions to ensure robust IT infrastructure security. They gained practical experience in designing, developing, testing, and evaluating secure software, which is critical for protecting against cyber-attacks. Additionally, the seminar emphasized the importance of developing comprehensive policies and procedures to manage enterprise

security risks effectively. Through interactive sessions and case studies, participants acquired the skills necessary to implement effective security measures and strategies in their professional environments. Overall, the seminar provided valuable insights into the evolving field of cyber security and equipped participants with the tools and knowledge to enhance their organizational security posture.
