INDUSTRIAL VISIT

Objective:

To provide students with practical knowledge and firsthand exposure to the operations of a company within the industry.

Programme Outcomes:

Upon successfully completing the program, students gained a thorough understanding of the various functions within the flour industry. They observed the intricate processes involved in production, quality control, and distribution, which deepened their comprehension of how different departments collaborate to achieve organizational goals. Furthermore, students acquired insights into the organizational design, learning how each serviceable area contributes to the overall success of the company. This experience not only enriched their academic knowledge but also prepared them for future careers by providing a realistic perspective on industrial operations and the dynamics of working within a company. By observing and engaging with real-world operations, students aimed to gain a deeper understanding of the industrial processes and the day-to-day activities within a consumer goods company. By exploring the working environment of Naga Atta Flour Consumer Division, students were able to bridge the gap between theoretical concepts learned in the classroom and real-world industrial practices.
