

DEPARTMENT : NUTRITION AND DIETETICS

ACTIVITY : ENTRY LEVEL TEST

YEAR : 2022-2023

DEPARTMENT OF NUTRITION & DIETETICS

DATE	TIME	VENUE	MODE
30.08.2022	1:30 p.m. to 2:30 p.m.	I B.Sc. Nutrition and Dietetics Classroom, EMG Yadava Women's College	Offline
Theme	To identify the slow-learning and fast-learning students		
Nature of the Activity	Entry Level Test		
Title	Nutrition and Dietetics		
Convener	Mrs.P.Tamilarasi Head, Assistant Professor of Nutrition & Dietetics EMGYWC		
Staff In Charge	Mrs.B.Ruba Rani Assistant Professor of Nutrition & Dietetics EMGYWC		
Participants	Students - 45		

ENTRY-LEVEL TEST ON "NUTRITION AND DIETETICS"

Objectives:

- To assess the foundational knowledge and understanding of students entering the field.
- To evaluate their grasp of basic concepts in nutrition, dietetics, and related scientific principles. To identify the student's current level of knowledge, the test will ensure adequate preparation for the coursework ahead and allow educators to tailor their teaching strategies to address any gaps in understanding.

Nature of test:

An entry-level test was administered to all incoming students to gauge their understanding of basic concepts in Nutrition and Dietetics. The test included a variety of questions to cover a broad range of topics within the field. The results were analyzed to identify students who performed below expectations. Students who demonstrated advanced understanding were also identified.

For slow learners, additional coaching classes will be organized to help them improve their understanding and performance. Learners were provided with a list of recommended books and E-resources to challenge and extend their knowledge.

Programme Outcome:

- The test successfully identified the students' existing knowledge and understanding of fundamental concepts in nutrition and dietetics. This included their comprehension of macronutrients, micronutrients, dietary guidelines, and the role of nutrition in health and disease.
- Areas where students demonstrated weaker understanding were highlighted, such as specific biochemical pathways, the impact of nutrition on chronic diseases, and advanced dietary assessment techniques. This information is crucial for instructors to address these gaps early in the program.
- Based on the test results, educators can develop tailored learning plans to ensure all students reach a common level of understanding. This includes supplementary materials, targeted tutorials, and additional practical exercises to strengthen weaker areas.
- The test results also informed curriculum adjustments, ensuring that the content is appropriately challenging yet accessible. This helps in aligning the program with the student's needs and promoting a more effective learning experience.

Feedback: Students reported that the Entry Level Test effectively highlighted their strengths and weaknesses, helping them understand where to focus and improve.
