BRIDGE COURSE

The Bridge Course on "Basic Web Services" was conducted with the objective of equipping students with fundamental knowledge in web services. The course aimed to provide a solid foundation in basic web technologies, focusing on the core principles and techniques necessary for developing web pages.

During the course, students learned essential concepts and skills related to web services, including the use of HTML tags to structure and format web content. The hands-on approach of the course enabled students to apply their learning practically by creating their own web pages.

Consequently, students successfully demonstrated their ability to design and develop simple web pages using HTML. The program outcome was achieved as
