FIELD VISIT - IDENTIFICATION OF CAMPUS PLANT SPECIES

The Department of Zoology at E.M.G. Yadava Women's College organized a field study for second-year Zoology students (Allied Botany) to explore and identify various plant species within the college campus.

Objective:

The primary objective was to enable students to:

- Identify different plant species within the campus.
- Learn their taxonomical names and classifications.
- Understand the ecological roles and medicinal benefits of the plants.

Outcome:

The students successfully identified several plant species, learned their taxonomical classification, and gained insights into their ecological and medicinal properties. This hands-on experience strengthened their practical knowledge of botany, contributing to their academic growth. The visit also instilled an appreciation for biodiversity and the importance of conserving plant species within local

ecosystems. The activity proved highly beneficial for students in applying theoretical knowledge to real-world botanical studies.
