INTERNSHIP PROGRAMME - TRAINING ON "SHARE TRADING"

Objective:

To provide students with practical knowledge and first-hand exposure to the world of share trading. The program aims to bridge the gap between theoretical learning and real-world application, enabling students to understand the dynamics of working in the financial markets and the industry at large.

Programme Outcome:

Upon the successful completion of the internship program, students significantly improvised their social interaction skills which is essential for networking and communication within the finance sector. They gained a deep understanding of the various functions and operations involved in share trading, including market analysis, risk management, and trading strategies. This hands-on experience allowed students to observe the fast-paced environment of trading floors and the decision-making processes that drive market movements. The internship not only enhanced their technical skills but also equipped them with the confidence and competence needed to pursue a career in the financial markets.
